DISCLOSURES & IMPORTANT INFORMATION

Acclivity Investment Research collaborates with Syntax Advisors to diversify the business risk within its investment strategies. Syntax's proprietary business classification system aims to capture the full range of economic activities in order to minimize business concentration risks.

Morningstar Small Value refers to the benchmark Morningstar US Small Cap Broad Value Extended TR Index.

¹ **Weighted-Average Market Cap (Billions)** measure of the average market capitalization of a group of stocks where each stock's market cap is weighted by its proportion to the group.

² **Price-to-book ratio** is a ratio used to compare a stock's market value to its book value, calculated by dividing the current price of the stock by the latest quarter's book value per share.

³ **"EBITDA / Total Market Value"** is a proxy for current cash flow to total market value. It is commonly known in factor investing as "profitability". EBITDA stands for earnings before interest, taxes, depreciation and amortization

⁴ **"12-month Asset Growth"** is the year-over-year percentage change in total assets. It is commonly known in factor investing as "investments".

⁵ Holdings and allocation data as of June 30, 2025. Percentages may not total 100% due to holdings in cash and/or securities that are not classified within GICS sectors. Fund holdings are subject to change and should not be considered investment advice.

⁶ Diversification does not ensure a profit or guarantee against loss.

Indices do not reflect any fees, expenses or sales charges and are not available for direct investment.

Important Risk Information

Investing involves risk, principal loss is possible, and there can be no assurance that investment objectives will be achieved. Past performance is not indicative of future results. The principal risks of investing in the Small Cap Value Fund are market risks, equities securities risks, management risks, value investing risks, and small-sized companies risks. Small capitalization companies' earnings and prospects are more volatile than large companies and may experience higher failure rates. Further, Value investing is subject to the risk that a company's intrinsic value may never be fully realized by the market or that a company judged by the advisor to be undervalued may actually be appropriately priced. For more information on the risks associated with this strategy, please refer to the Fund prospectus.

Mutual Funds involve risk including the possible loss of principal.

Investors should carefully consider the investment objectives, risks, charges and expenses of the Innealta Funds.
